

EQUUS NOVAGLASS MEMBRANE SYSTEMS

NOVEMBER 2021

Available globally since 1986, Equus Novaglass membranes have proven their durability in NZ for over 20 years.

They are suitable for all types of roof structure and can also be used to upgrade existing flat roof areas without the need to remove the original waterproofing. Suitable for all roof substrates. Thermal insulation boards can be included in any Equus Novaglass system to give a cost effective highly insulated warm roof that meets the latest building standards.

The UV resistant membranes are easily installed by traditional torch-on application, but Novaglass can also be installed entirely without using naked flame, which is perfect for those difficult roof retrofit projects.

Equus Novaglass offers the building owner an attractive coloured slate finish, provides protection against all of New Zealand's demanding weather conditions and of course comes complete with a full Equus Novaglass material warranty.

EQUUS NOVAGLASS POLIBIT MINERAL MEMBRANE SYSTEM

The Polibit Mineral Membrane System consists of a Polibit Mineral cap sheet torched to a 3mm self adhesive (SBS) base sheet, to form a two layer waterproofing membrane system suitable for flat roof waterproofing.

Polibit Mineral membrane is a plastomeric, modified bitumen (APP) membrane reinforced with non-woven polyester and fibreglass reinforcement. The upper layer is coated with coloured slates to provide an aesthetically pleasing finish, suitable for roof waterproofing.

This system can be used on plywood or concrete substrates to form a standard cold roof system or over thermal insulation board to provide a warm roof system.

System Components:

- Novaglass Polibit Mineral
- Novaglass NOVA-SK 3mm
- Equus Peel & Stick Primer
- Alsan Mastic 2200 by SOPREMA
- Thermal Insulation Board for warm roof systems

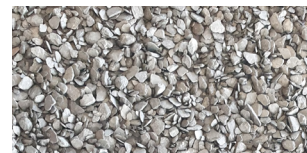

Key Benefits:

- BRANZ Appraised
- Economical choice
- Two layer system
- Proven UV resistance
- Proven resistance against weather, low & high temperatures and atmospheric conditions
- Good durability and easy maintenance
- Life expectancy of at least 20 years in NZ climates
- Guaranteed thermal resistance in warm roof systems
- Complete roofing solutions with accessories
- Compatible with Equus FixPlus pedestals for decks

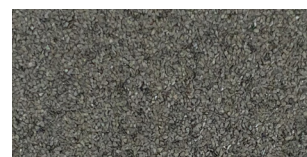

Available Colours:

Dark Grey

Black Diamond

EQUUS NOVAGLASS NOVA-SK MINERAL MEMBRANE FLAMELESS SYSTEM

The NOVA-SK Mineral Membrane System consists of a NOVA-SK Mineral cap sheet self-adhered to a 3mm self-adhesive (SBS) base sheet, to form a two layer waterproofing membrane system suitable for flat roof waterproofing.

NOVA-SK Mineral membrane is a self-adhesive modified bitumen (SBS) membrane reinforced with non-woven polyester and fibreglass reinforcement. The upper layer is coated with coloured slates to provide an aesthetically pleasing finish, suitable for roof waterproofing where a flameless application is required.

This system can be used on plywood or concrete substrates to form a standard cold roof system or over thermal insulation board to provide a warm roof system.

Available Colours:

Dark Grey

System Components:

- Novaglass NOVA-SK Mineral
- Novaglass NOVA-SK 3mm
- Equus Peel & Stick Primer
- Alsan Mastic 2200 by SOPREMA
- Thermal Insulation Board for warm roof systems

Key Benefits:

- BRANZ Appraised
- Economical choice
- Two layer system
- Flameless self-adhesive application
- Proven UV resistance
- Proven resistance against weather, low & high temperatures and atmospheric conditions
- Excellent durability and easy maintenance
- Life expectancy of at least 20 years in NZ climate
- Guaranteed thermal resistance in warm roof systems
- Complete roofing solutions with accessories
- Compatible with Equus FixPlus pedestals for decks

Equus SOPREMA Technical Support:

- Project specific specifications and details
- Condensation risk analysis for warm roof systems
- Wind uplift study for warm roof systems
- On-site quality assurance
- Nationwide network of Certified Applicators
- Warranties available

WHO ARE WE?

Equus Industries provides technical waterproofing solutions for Architects, Engineers, Property Managers, and Contractors in the building industry. One system does not fit all.

Equus can provide complete solutions, systems, specifications, technical support and warranties.
